ELECTROFUSION JOINTS

FOR HDPE PIPES

THE INTELLIGENT SYSTEM SOLUTION

Print Edition for March 2024

Introduction

Sansico Industries Sdn Bhd

In the past decade, Sansico Industries Sdn Bhd, has progressed to be a market leader in the manufacture of fittings for internal plumbing systems.

The Intelligent System Solution

The Sansico Electrofusion fittings system is specifically designed for reliable, high performance jointing and long service life for polyethylene piping systems. Our automated jointing system has been proven to be the most economical as it eliminates the potential for operator error.

We offer quality tools and micro processor electrofusion machines, which when combined with our fittings offer state-of-the-art high performance pipe jointing solutions. Our intelligent electrofusion machine is able to ensure quality control by data retrieval of measurements and records. This together with our SIRIM certified and SPAN approved BS EN 12201-3 electrofusion HDPE fittings assure you of a minimum 50 years life span for your potable water needs.

Fittings

Our fittings comply to MS 1058:PART 3:2006 and are PN16 rated. The Sansico Electrofusion Fittings system comes in sizes from 20mm to 315mm and is manufactured using PE100 materials.

The benefits of the Sansico HDPE potable water system over other systems are low installation cost, non toxicity, corrosion resistance, high flow capacity and long life span. Material wise, HDPE has superior properties compared to other plastic material in relation to water hammer problems.

INTRODUCTION

Advantages

BBB SANSICO/CS SANSICO HDPE pipes strictly conform to MS1058: Part 2: 2002 standard specifications. Our products are licensed by SIRIM and approved by the local water authorities to be used as the top mark for quality. The granting of the top mark confirms that the company's manufacturing, testing and quality control systems comply with the stringent licensing requirements and thus ensures that the products quality is consistently maintained.

Advantages for using BBB SANSICO/CS SANSICO HDPE Pipe

HIGH DENSITY POLYETHYLENE (HDPE)

PIPES FOR COLD WATER SYSTEM

Our pipes are SIRIM approved and manufactured using approved raw materials, high density polyethylene and comply to MS 1058. The main advantages of polyethylene pipes for the transport of pressure fluids can be summarised as follow:

- ease, reliability and cost efficiency of jointing and laying operations.
- non toxic, low abrasion and flexibility.
- excellent resistance to water hammer phenomena.
- absence of scale on inside walls results in consistency of pipeline hydraulic performance.
- immune to corrosion phenomena and has very good resistance to a wide range of chemicals.

The products are examined and tested to ensure the compliance with all the relevant standard specification. The specified tests carried out are:-

- Appearance, dimensions and ovality
- Hydrostatic strength at 80° C for 165 hours
- Hydrostatic strength for 80°C for 1000 hours
- Oxidation Induction Time (OIT)
- Melt Flow Rate (MFR)

Electrofusion Fittings Specifications

Features

- **Material:** PE 100
- **Size:** 20mm to 315mm
- **Pressure Rating:** PN 16 bar / SDR11
- **Standard:** BS EN 12201-3:2003
- **Color:** Black
- **Joint:** electrofusion joint

Advantages

- **Non-toxic:** no heavy metal additives, would not to be covered with dirt or contaminated by bacterium.
- **Corrosion Resistance:** resist chemical matters and electron chemical corrosion
- **Low Installation Costs:** light weight and ease of installation can reduce installation costs
- **High Flow Capacity:** smooth interior walls result in low pressure loss and high volume
- **Longevity:** more than 50 years under proper use

Electrofusion Welding Machine

Elektra Light

Code	Application Range (mm)
SEL125	20 - 125 mm

*with data logger

Technical Features

	230V
Max welding diameter:	Ø 20 - Ø 125 (*)
Welding materials:	PE, PP, PP-R
Dimensions (DxWxH):	200x250x210 mm
Weight (with the bag):	7.6 Kg
Power Supply:	230 VAC 50-60 HZ
Max total power absorbed:	2700W
Nominal absorbed current:	8A
Welding nominal current Duty Cycle 60% (ISO 12176-2):	23A
Working temperature:	-10°C / +40°C
Welding voltage:	8 / 48 V
Peak electric power:	60A
Protection degree:	IP54
Connectors diameter:	F - 4 mm
Adapters diameter:	F - 4,7 mm
Memory capacity:	350 reports

(*) OD 160mm couplers can also be welded but with precaution; wait for the machine to cool off completely after each welding cycle.

Standard Equipment

- Connector adapters F 4mm / 4,7mm
- Transport case
- Manual scraper
- Scanner for barcode reading
- Data transfer software

On Request

- Serial portable printer + connection cable

Electrofusion Welding Machine

Elektra 315

Code	Application Range (mm)
SEM315	20 - 315 mm

*with data logger

Technical Features

Max welding diameter:	Ø 20 - Ø 315
Welding materials:	PE, PP, PP-R
Dimensions (DxWxH):	358x285x302 mm
Weight (with the box):	19 Kg
Power Supply:	230 VAC 50-60 Hz
Max total power absorbed:	2700W
Working temperature:	-10°C / +40°C
Welding voltage:	8 / 48 V
Peak electric power:	80A
Protection degree:	IP54
Connectors diameter:	F - 4 mm
Adapters diameter:	F - 4,7 mm
Memory capacity:	4000 reports

Standard Equipment

- Connector adapters F 4mm / 4,7mm
- Transport case
- Manual scraper
- Scanner for barcode reading
- Data transfer software

On Request

- Serial portable printer + connection cable

Electrofusion Welding Machine

Elektra 500

Code	Application Range (mm)
SEM500	20 - 500 mm

*with data logger

Technical Features

Materials:	HDPE/PP/PP-R
Working range:	Ø 20 ÷ 500 mm
Power supply:	110 V single phase 50/60 Hz 230 V single phase 50/60 Hz
Total absorbed power:	5500 W (110 V) - 6400 W (230 V)
Max output current:	100 A (110 V) - 120 A (230 V)
60% Duty Cycle output:	70 A
Memory capacity:	4000 reports
Protection degree:	IP 54
Dimensions:	255x270x385 mm
Dimensions carrying case:	410x290x485 mm
Weight:	24 Kg

Standard Equipment

- Universal adapter Ø 4,0 - 4,7mm
- Laser scanner
- Manual scraper
- Transport case

On Request

- GPS
- Printer ESC-POS

Electrofusion Welding Machine

Elektra 1000

Code	Application Range (mm)
SEM1000	20 - 1000* mm

* Contact manufacturer for further information on electrofusion fittings above Ø 1200 mm

Technical Features

Materials:	HDPE/PP/PP-R
Working range:	Ø 20 ÷ > 1000* mm
Power supply:	230 V single phase 50/60 Hz
Total absorbed power:	6400 W
Max output current:	120 A
60% Duty Cycle output:	90 A
Memory capacity:	4000 reports
Protection degree:	IP 54
Dimensions:	255x270x385 mm
Dimensions carrying case:	410x290x485 mm
Weight:	26 Kg

Standard Equipment

- Universal adapter Ø 4,0 - 4,7mm
- Laser scanner
- Manual scraper
- Transport case

On Request

- GPS
- Printer ESC-POS

Installations

Electrofusion Joint

Clean pipe and cut ends squarely

Measure and mark stab depth on pipe

Mark the stab depth area with criss-cross pattern using bright color marker

Scrape the pipe and all the criss-cross pattern

Clean with suitable degreasing agent

Stab pipe completely into fitting

Fuse the joint

Do not disturb joint during cooling time

Product Warranty

Sansico Industries Sdn Bhd warrants its materials to be free of defects in workmanship and under normal use, service and when used for the purposes under the conditions for which they are intended.

This warranty shall not apply to any Sansico Industries Sdn Bhd material that has been altered, repaired and/or used in any way, stored outside, or has been subject to misuse, negligence, accident and/or has not been installed in accordance with installation instructions.

Installation of Sansico Electrofusion fittings requiring 40V to fuse must be carried out using a Sansico Electrofusion processor. The Sansico processor is a 8-48 volt output multi-voltage fusion processor with temperature compensating feature operating at 230/240 VAC requiring power supplied through portable power generator rated at 3000 watts (minimum) - 6500 watts (maximum). If pipe is more than 1.5% out of round the use of a ReRound Clamp is recommended to ensure proper installation.

Installation instruction must be adhered to, or our Product Warranty is null and void. Installation of electrofusion fittings must be carried out by properly trained and qualified operator(s) and/or by witness of the factory representative.

The obligation of Sansico Industries Sdn Bhd under this warranty shall be limited to replacement of any part that may prove defective under normal use.

Sansico Industries Sdn Bhd shall have the right to inspect the said material and purchaser shall, if requested, return defective product prepaid to the Sansico Industries Sdn Bhd. Purchaser shall assume all responsibility and expenses for removal, reinstallation and freight charges in connection with the foregoing remedy.

Sansico Industries Sdn Bhd shall not be liable for indirect, special, incidental or consequential damage or penalties and does not assume any liability of purchaser to other, or to anyone for injury to persons and/or property.

Any claim regarding shortage or damages from shipment of material must be submitted in writing to Sansico Industries Sdn Bhd within 10 days after receipts of shipment. Buyer shall note loss or damage on delivery order and provide a delivery receipt stating such with driver's signature.

Purchaser is responsible for passing on this Limited Warranty to their customer.
